Synopsis

Results-driven Clinical Data Associate with expertise in clinical data management at Clinical Research Network India. Proven track record in data validation and regulatory compliance, enhancing data integrity through effective discrepancy resolution. Strong critical thinking skills complemented by proficiency in electronic data capture systems, ensuring accurate and reliable clinical documentation.

Work History

2024-March to Current

Clinical Data Management Associate**Clinical Research Network India, Noida**

- Managed end-to-end clinical data management activities, including data collection, data entry, validation, cleaning, and final database review in compliance with regulatory and protocol requirements.
- Designed and implemented data validation rules and Edit Check Specifications to ensure accuracy, consistency, and completeness of clinical trial data.
- Performed comprehensive data discrepancy identification and resolution, including data query generation, tracking, and closure within Electronic Data Capture (EDC) systems.
- Conducted routine and final quality control checks on clinical datasets to ensure high data integrity and readiness for analysis and regulatory submission.
- Utilized Electronic Data Capture (EDC) systems and clinical trial platforms such as e-Meddec and IWRS (Interactive Web Response System) for efficient data handling and subject management.
- Developed, maintained, and reviewed Clinical Data Management documentation, including Data Management Plans, Edit checks specification, Annotated CRF, User Acceptance Testing and study-specific guidelines.
- Designed and supported clinical trial databases in alignment with study protocols, CRFs, and regulatory standards.
- Conducted systematic data cleaning procedures to improve data reliability, traceability, and audit readiness.
- Prepared and maintained regulatory-compliant documentation, supporting inspections and submissions through accurate and well-organized clinical data records.
- Authored and executed validation documentation including IQ, OQ, PQ, Validation Plans, and User Requirement Specifications (URS).
- Applied strong critical thinking and analytical skills to identify data trends, troubleshoot issues, and implement process improvements.
- Collaborated cross-functionally with clinical teams to ensure seamless data flow and compliance throughout the study lifecycle.

- Trained and mentored new team members on data management processes, EDC systems, SOPs, and quality standards.

Education

2023	M.Sc. in Biotechnology	Chaudhary Charan Singh University, Meerut
2021	B.Sc. in Biotechnology	DR. K.N.MODI INSTITUTE, Modinagar
2018	Intermediate	C.B.S.E (DHT Saraswati Vidhya Mandir, Ghaziabad)
2016	Matriculation	C.B.S.E (DHT Saraswati Vidhya Mandir, Ghaziabad)

Skills

- Clinical data management
- Data validation (Edit Check Specifications)
- Regulatory compliance
- Data discrepancy resolution
- Quality checks
- Data entry
- Clinical Data Management documentation
- Electronic Data Capture System (e-Medidex, IWRS (Interactive Web Response System))
- Data query resolution
- Safety data assessment
- Data cleaning procedures
- Database design proficiency
- Critical thinking aptitude

Additional Information

- Expertise in MS Office
- MS Excel (Vlookup, Xlookup, Power Query, Data Merging,)
- MS Word
- MS PowerPoint

Certifications

- 2024 GCP (Good Clinical Practice) (NIDA Clinical Trial Network)
- 2025 ICH GCP E6 R3- Summary of Changes
- 2025 Certification in Clinical Data Management (Bangalore Clinical Research Institute)

Languages

- Hindi, English
